

h1>Zinc oxide 99-100.5% p.a. [1314-13-2]

CAS number: **1314-13-2**

Summary formula: **ZnO**

Molar mass: **81.37 g/mol**

Application: **It is used as a feed, food, pharmaceutical and cosmetic additive, dye and pigment, fuel and lubricant additive, in surface treatment and electroplating, as an intermediate and chemical reagent, battery component, corrosion inhibitor and anti-corrosive agent**

## PRODUCT DESCRIPTION

Form: solid

Color: white

Odor: no smell

pH: 7 (50 g / l H<sub>2</sub>O at 20 ° C)

Melting point: around 1975 ° C

Boiling point: no data available, sublimation point about 1800 ° C

Flash point: non-flammable

Density: 5.68 g / cm<sup>3</sup> (20 ° C)

Solubility:

in water: insoluble
